1.Introduction

1.1. Purpose

This release document contains a description of new features, changes, improvements and/or bug fixes of this latest release.

Thank you for your interest in the release notes of VizX2. Should any of the described items be unclear or if you would like to receive more information on a specific update, for questions customer can reach out to ziuz.freshdesk.com

Please also read the release notes from previous versions if these versions were skipped in the upgrade process. These releases also contain new functions and fixes.

Although this document contains information on previous versions, please check the previous release note documents for more detailed information on new functionality. Release information prior to version 2.7.0 has been deleted from this document and can be found in older release notes.

1.2. Focus

The focus of the 2.9.4 release is on further stabilization, simplification, and performance enhancements. While no major new functionalities have been introduced in this version, several critical fixes have been implemented to ensure the smooth operation of VizX. Additionally, numerous minor change requests and other improvements have been addressed, which are detailed further in this document.

1.3. User Guides

The latest version of the VizX2 User Guide is included in the VizX2 Dashboard: "ZiuZ VizX 2.9.4 - User Guide v1.5"

The User Guide for the NCMEC Reports Module is available as separate document: "ZiuZ VizX 2.8.0 - NCMEC Reports - User Guide v1.5".

2. Release Notes

2.1. Functional changes

Feature id: 346480	Licensing Management for VizX2
Description:	<p>Licensing Management for VizX2 Teamwork: This release introduces Licensing Management for VizX2 Teamwork Client-server communication, allowing administrators to efficiently manage and monitor VizX2 licenses. Users can now activate, deactivate, and track license usage, ensuring compliance and optimal utilization of resources.</p> <p>Client receives response from server about license validity.</p> <ul style="list-style-type: none">• If license is invalid/expired/exceeds users:<ul style="list-style-type: none">◦ Client receives proper error message.• Client-side UI displays an appropriate error message (e.g., "License expired" or "User count exceeded").
Screenshots:	
Added to build:	2.9.4.12
